

14 July, 2011

Dear Member of Congress:

We, the undersigned natural and social scientists, urge you to help protect fish, fishermen and fishing communities by keeping all feasible management options available to allow local fishermen and managers to choose what is best for them and their fisheries. Please help stop any action that would artificially limit the use of catch shares or any other tool and unnecessarily constrain the regionally-based processes that take into account the specific conditions in which each fishery operates.

Our collective experience – reported and analyzed in the scientific literature – shows very clearly that fisheries across the United States have unique biological, ecological, social and economic attributes. Moreover, each fishery has unique goals and challenges, and requires tailored management approaches to achieve those goals. Many of us have worked with the regional fishery management councils to ensure that they use the best available science to choose management approaches. We have seen firsthand the importance of having all tools available to address the wide array of challenges in our fisheries. Arbitrary removal of options from the management toolkit limits the capacity of fishermen, managers and regional councils to select the best approaches, as mandated by law and required for enduring management success.

While in some cases fishery management councils have made an explicit decision not to develop catch shares for some fisheries, most of the councils have worked with fishermen to develop catch shares for at least some fisheries, and a growing fraction of total U.S. landings is managed through catch shares. Proposals that would limit future development, approval or implementation of new catch share programs – even when they are the preferred option of fishermen and managers – would significantly harm the ability of regional councils to meet biological, social and economic goals. Catch share systems can be developed to fit a wide variety of fishery characteristics and management objectives. They should remain with all others in a comprehensive fisheries management toolkit available to local decision makers.

We strongly urge you to maintain the current ability of fishermen, managers, the regional fishery management councils and NOAA to use a full complement of tools in rebuilding and sustaining vibrant fisheries and coastal economies in the United States.

Sincerely,

Daniel C. Abel, Ph.D.

Associate Professor of Marine Science
Director, CCU Sustainability Initiative
Senior Fellow, U.S. Partnership for Education
for Sustainable Development
Coastal Carolina University, SC

Jerald S. Ault, Ph.D.

Professor of Marine Biology & Fisheries
University of Miami, FL

Lee Anderson, Ph.D.

Maxwell P. and Mildred H. Harrington
Professor of Marine Policy
University of Delaware, DE

Peter J. Auster, Ph.D.

Research Professor of Marine Sciences
University of Connecticut, CT

Elizabeth A. Babcock, Ph.D.

Research Assistant Professor, Division of
Marine Biology and Fisheries
Rosenstiel School of Marine and Atmospheric
Science
University of Miami, FL

Xavier Basurto, Ph.D.

Assistant Professor of Sustainability Science,
Nicholas School of the Environment
Duke University, NC

James P. Beets, Ph.D.

Professor of Marine Science
University of Hawai'i - Hilo, HI

W. Jeffrey Bolster, Ph.D.

Associate Professor of History
University of New Hampshire

Trevor A. Branch, Ph.D.

Assistant Professor, Aquatic & Fishery
Sciences
University of Washington, WA

Jeffrey A. Buckel, Ph.D.

Associate Professor, Dept. of Biology
Center for Marine Sciences & Technology
North Carolina State University, NC

Lawrence B. Cahoon, Ph.D.

Professor, Biology and Marine Biology
University of North Carolina - Wilmington,
NC

Mark H. Carr, Ph.D.

Professor, Dept. of Ecology and Evolutionary
Biology
Long Marine Laboratory
University of California - Santa Cruz, CA

Paulinus Chigbu, Ph.D.

Professor and Director, Living Marine
Resources Cooperative Science Center
University of Maryland - Eastern Shore, MD

Patrick Christie, Ph.D.

Associate Professor, School of Marine and
Env. Affairs and Jackson School of Intl.
Studies
University of Washington, WA

Christopher Costello, Ph.D.

Professor of Resource Economics
Bren School of Env. Science & Mgmt.
University of California - Santa Barbara, CA
Faculty Research Fellow, National Bureau of
Economic Research

James H. Cowan, Jr., Ph.D.

Professor, Dept. of Oceanography and Coastal
Sciences
Louisiana State University, LA

Robert K. Cowen, Ph.D.

Associate Dean for Research
Maytag Professor of Ichthyology
